Vol. VIII, No. 12

December 1964

NOVEMBER UNIFORM PRICE \$4.28

Dairy farmers will receive a uniform price of \$4.28 for November 1964 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, Milk Order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.5 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. This price is 3 cents higher than the October 1964 uniform price, and is 11 cents higher than the uniform price of a year ago.

PRODUCER RECEIPTS

Daily producer receipts are down 4 percent from a year ago, but there are 50 less producers on the market. Most of the months this fall the drop in producer numbers has not necessarily meant a drop in daily receipts. The average daily production per herd keeps going up with the reduction in number of producers to keep the monthly average receipts about the same.

REFERENDUM

A referendum is being conducted by mail on Order No. 31, As Amended. Producers have until midnight December 18, 1964, to vote, and if 67 percent vote yes, it will probably become effective February 1, 1965. Principal changes in the order are the expansion of the marketing area to include the counties of Kosciusko, Marshall, Starke, Lake, and Porter, with townships in Lake County that are now under the Chicago Order No. 30, being taken out of that Order and put under this Order. The name would be changed from South Bend-LaPorte-Elkhart, Indiana, Marketing Area to the Northwestern Indiana Marketing Area. The special Class II for cottage cheese would be eliminated and changed to a two class market with fluid products in Class I and manufactured in Class II. The butterfat differentials would be lower, and the present supply-demand adjustment deleted, and the Chicago supply-demand adjustment used in its place. The premium over manufacturing milk would be raised 10 cents to an average of 120 for the year, and Class II price will be based on the current Minnesota-Wisconsin price series instead of the condensery pay price.

CLASS I PRICE

The Class I price for the December 1964 delivery period will be \$4.51 per hundredweight for 3.5 percent milk. The price was computed by adding \$1.10 per hundredweight to the basic formula price (\$3.29), plus the 12 cent supply-demand adjustment. The supply-demand adjustment for the January 1965 delivery period will be zero.
